

DILUKSHIKA SIVANATHAN

BSc (Hons) Applied Computing | Junior Software & Data Developer | IT Support

Cambridgeshire, United Kingdom | dilukshika99@gmail.com |

linkedin.com/in/sivanathan-dilukshika | github.com/Dilukshika

PROFESSIONAL PROFILE

First-Class Honours graduate in Applied Computing (University of South Wales) with a Distinction-level Higher National Diploma in Software Engineering, covering programming, application development and database design. Backed by nearly three years of hands-on IT experience at the University of Jaffna supporting Linux/Windows systems, servers and networks, plus practical project work building IoT data-collection and monitoring systems with real-time dashboards and automated logging. Over a year of UK work history, a quick learner who communicates clearly with stakeholders at all levels and adapts fast to new tools. Recently co-authored peer-reviewed research on AI-driven cybersecurity education, presented at an international conference. Seeking a Skilled Worker sponsored junior software developer or data role in the UK.

KEY SKILLS

- **Programming & Development:** application development, object-oriented and procedural programming, algorithms and problem-solving, Git/GitHub version control
- **Data & Monitoring:** data collection and real-time monitoring, reporting and dashboards, IoT sensor integration (ESP8266/ESP32), API/webhook automation, Google Sheets logging
- **Databases:** database design and development, structured data handling
- **Systems & Infrastructure:** Linux & Windows administration and troubleshooting, server configuration & maintenance, networking (switches, routers), Zabbix & Nagios
- **Tools & Applications:** Microsoft Word, Excel and PowerPoint; Arduino; POS systems
- **Professional:** research & written analysis, client/stakeholder communication, time management, teamwork in multicultural environments

PUBLICATIONS

CyberSafe: An AI-Driven Ludic-Pedagogical Framework for Predictive Cybercrime Vulnerability Assessment Among Sri Lankan School Students

NPAIRC 2026 — *International Research Conference of the National Police Academy, Sri Lanka* · August 2026

- Co-author of peer-reviewed research accepted and presented at NPAIRC 2026 (theme: “Transnational Crime and Social Protection: Integrated Responses for Global Security”), organized by the National Police Academy Sri Lanka in association with UNODC; **recognized as author with certificate awarded**.
- Contributed to an AI framework using ensemble machine learning (SVM and Random Forest) for predictive cybercrime vulnerability assessment (93%+ accuracy), with SHAP-based explainability and 18 adaptive game-based learning modules, built on a MERN-stack web application with a Flask AI microservice.
- Co-authored with Selvavinayagan Babiharan (University of Kelaniya, Sri Lanka).

RESEARCH & PROJECTS

Energy Meter with Data Collection & Monitoring System

BSc Final-Year Project, 2024–2025

- Designed and built a real-time energy monitoring system measuring voltage, current and power using an ESP8266 microcontroller with SCT-013 and ZMPT101B sensors.
- Streamed live readings to a Blynk IoT dashboard and automatically logged data to Google Sheets via webhook integration for ongoing analysis and reporting.
- Demonstrated an end-to-end data pipeline: sensor acquisition, processing, real-time visualisation and automated data logging.

Smart Document Locker System

HND Project, 2019–2021

- Developed a secure document locker with multi-factor authentication (RFID and biometrics) using Arduino, integrating hardware and embedded programming.
- Applied security, access-control and application development principles from concept through to a working prototype.

WORK EXPERIENCE

IT Support Assistant

Jul 2022 – May 2024

IT Department, University of Jaffna, Sri Lanka

- Provided technical support for Linux/Windows systems, keeping internal and public-facing servers running with minimal downtime.
- Monitored infrastructure using Zabbix and Nagios, responding to alerts and troubleshooting issues to maintain uptime.
- Installed, configured and maintained networking equipment including switches and routers.
- Supported staff and students with hardware and software setup, system configuration and device migration.
- Produced monitoring data and reports to track system performance and support IT decision-making.

Postmaster

2025 – Present

Post Office (SPAR, Cambridge), United Kingdom

- Run the in-store Post Office counter, delivering mail, parcel, banking, bill-payment and identity/verification services to customers accurately and efficiently.
- Handle cash, foreign currency and high-value transactions with strict accuracy, balancing tills and Post Office accounts daily.
- Ensure compliance with Post Office Ltd procedures, anti-money-laundering checks and data-protection requirements, safeguarding confidential customer information.
- Oversee day-to-day branch operations, postal stock and secure record-keeping, resolving customer queries professionally in a regulated environment.

Stock Assistant / Retail Assistant

2025 – Present

SPAR, Cambridge, United Kingdom

- Delivered face-to-face customer service and processed cash/card transactions accurately via POS systems, maintaining strict cash-handling and till-balancing procedures.
- Handled confidential customer information and Post Office transactions in a regulated, compliance-focused environment.
- Managed stock control, deliveries and visual merchandising while maintaining health and safety standards.

Sales Assistant

2024 – 2025

Lansberry Shop, United Kingdom

- Managed stock replenishment, delivery intake and FIFO stock rotation within a busy retail team.
- Assisted customers and supported store opening/closing procedures, building reliable UK work history.

IELTS Invigilator

2023 (9 months)

IDP Education, Sri Lanka

- Set up examination rooms, verified candidate identities and gave precise instructions in a highly regulated environment.
- Maintained strict confidentiality and process integrity, strengthening organisational and communication skills.

EDUCATION

BSc (Hons) Applied Computing — First-Class Honours

2024 – 2025

University of South Wales, United Kingdom

- Final-year project: Energy Meter Data Collection & Monitoring System (see Research & Projects).

BTEC Level 5 HND, Computing (Software Engineering) — Distinction

2019 – 2021

British College of Applied Studies, Sri Lanka (Pearson BTEC)

- Distinction across 13 of 14 units, including Programming, Advanced Programming, Application Development, Database Design & Development, Networking and Security.
